WHAT THERAPISTS SAY

"Learning personality development through the eyes of David Daniels and Helen Palmer is being given the gift of deep insight into how temperament and attachment intertwine – both personally helpful and professionally useful in understanding our many layers of perception, emotion and habits of mind. Thank you for providing such exciting new vistas." **DANIEL SIEGEL, MD**, world-renowned expert in Attachment Theory and associate clinical professor of psychiatry at the UCLA Center for Culture, Brain and Development

"I've used the Enneagram as a clinical diagnostic tool for 28 years. It's the roadmap for both clients and therapists that reveals the core of behavioral fixation and then teaches how to characterologically and spiritually transcend that abyss. My clients have loved it and have benefited from it tremendously." **KATHLEEN C. TAMM, MFT**

"As a licensed clinical psychologist for 20 years, I have attended numerous workshops, classes and training throughout my career. Never have I come across an opportunity for both personal and professional growth anything like what is offered in the Enneagram Professional Training Program. Far beyond advancing my clinical skills, this program has helped me move forward as a full human being." **DAN SIMMONS, PhD**
